

Professional Water Audit Training

by CIPHE/ Navigator Productions/ WaterwiseEast

The course takes approximately 2-4 hours to undertake and features a mix of dynamic video and interactive quizzes.

The content of the course includes the following modules:

- Introduction – why do we need water audits / The importance of water / Water Consumption – the current picture / Reducing water use / Water Audit – a detailed look at everything you need to know / Water system strategy development / Water efficient solutions / Reusing water / Engaging consumers

By the end of the course you will have all of the necessary information and practical guidance to understand this important topic and if you pass the necessary assessment will be able to print out a certificate of achievement.
