

## Peter Wilder

Peter Wilder has worked and studied in the field of Horticulture and plant sciences, Landscape Architecture, Urban Design and Hydrology in Australia, USA, UK, Netherlands, and Germany. After graduating in 1996 from the University of Greenwich with honours he was involved in the design of Potsdamer Platz and Spreebogen in Berlin. In 1999 he returned to the UK to complete his post graduate studies and continued to work on major urban regeneration programmes in the UK including the Paddington Basin, Greenwich Peninsula and Wembley City. In 2003 he established his own practice specialising in the design of surface water management including the restoration of contaminated land and the construction of roof deck systems for rainwater attenuation and biodiversity.

Peter Wilder is currently a Director of Wilder Associates Ltd and an advisor to the UK Green Building Council as well as a BRE Associate. He is currently appointed as the Strategic Landscape Architect to the City of London for the Flood and Water Management Works at Hampstead Heath. He is currently working on strategic environmental planning projects in 12 countries including China, Brazil, USA, Canada, Bermuda, Kenya, Bulgaria and the UK.
