

Save up to **100,000** litres of water every year with just one valve!

**WATERFREE
CONVERSION**

The Free Flow Valve from Enviro Water is a revolutionary water free urinal system that will save water, prevent bad odours and reduce your costs. Each valve fitted to your systems will save up to 100,000 litres of water, every year, per urinal and **reduce your costs by up to £300 per urinal, per year.**

**SAVE
MONEY**

**NO
MAINTENANCE**

The Enviro Water Free Flow Valve is the easy way to convert your standard urinals to water free. Becoming water free will make your washrooms cleaner and reduce limescale and blockages. It's completely chemical free, easy-to-clean, simple to fit and no on-going maintenance is required.

**EASY
TO FIT**

Already saving water? Do you know that by only reducing the water, your urinals will be still at risk of bacteria, blockages and bad odour? Switch to Enviro Water and you will not only remove the need for costly water completely, you won't be at risk of blockages, bad odours and bacteria.

**EASY
TO CLEAN**

**ECO
FRIENDLY**

Make the switch today, save money and promote your business as one that protects the environment, by being 100% water free. To find out more:
